☐ Continuation Sheet Attached

☐ Proposed Amendment or Arguments Attached

Brief Description of Arguments to be Presented:

Matsuo discloses a cooling system disposed outside the machine and outside of bearings (10) (cf. Figs. 5, 6) so that coolant is heated as it enters the stator core. In contrast thereto, coolant enters inside the machine of the

invention into the coolant channel 7 which is disposed radially adjacent to the magnet
arrangement, i.e. dispersion of coolant inside the machine.

An interview was conducted on the above-identified application on _____.

NOTE: This form should be completed by applicant and submitted to the examiner in advance of the interview (see MPEP § 713.01).

This application will not be delayed from issue because of applicant's failure to submit a written record of this interview. Therefore, applicant is advised to file a statement of the substance of this interview (37 CFR 1.133(b)) as soon as possible.
